Socioeconomic inequalities in the use of NHS care in England

Anita Charlesworth
Director of Research and REAL Centre
(Research and Economic Analysis for the Long term)
Proportion of people spending more than 10% of income in out-of-pocket health care charges (2010)

* USA data 2013; Japan data 2008.
Proportion of people who skipped a consultation due to cost (2016 or nearest year)

Source: OECD ‘Health care quality indicators’. * Denotes an OECD data source other than Commonwealth Fund survey.
Proportion of people who skipped a prescription medicine due to cost (2016 or nearest year)

Trends in GP practice payments per patient by neighbourhood deprivation

Source: Data are from NHS Digital, ONS, and MHCLG quintiles aggregated from LSOA 2011 neighbourhoods
Trends in general practice workforce supply per 100,000 population by neighbourhood deprivation

GPs excluding registrars, retainers and locums

Numbers of staff (FTE) per 100,000 weighted population

2015/16  2016/17  2017/18  2018/19
Trends in general practice workforce supply per 100,000 population by neighbourhood deprivation
Trends in primary care appointments carried out by GPs or other practice staff by neighbourhood deprivation

Source: Data are from NHS Digital (appointments) and DWP (index of multiple deprivation) based on LSOA 2011 neighbourhoods.
Trends in face-to-face and telephone appointments by neighbourhood deprivation

Face-to-face

Telephone

Source: Data are from NHS Digital (appointments) and DWP (index of multiple deprivation) based on LSOA 2011 neighbourhoods.

Note: scales differ between charts, the majority of appointments are face-to-face.
Trends in CQC rating by neighbourhood deprivation

Source: Data are from the Care Quality Commission (CQC) and DWP index of multiple deprivation based on LSOA 2011 neighbourhoods.
Trends in patient satisfaction score by neighbourhood deprivation

Source: Data are from NHS Digital (OOF) and DWP (index of multiple deprivation) based on LSOA 2011 neighbourhoods
Thank you
